

# FlashRunner for STMicroelectronics.

ST10, ST7C, ST7F, STR7, STR9, STM32  
and Serial Memories Supported.

The First Complete Production  
In-System Programmer specifically  
designed for Manufacturing lines.

- Fastest Programming Algorithms in the market
- Easy integration with Automatic Test Equipments (ATE) and Manufacturing Systems
- Compact and robust, designed for the production environment
- Standalone and LAN/RS-232 connections
